

Course Name: Data Handling and Visualization
Course Code: DSA0601
Name: Raklesh Karan R
Register No: 192524253

Activity - 2

Chart 1 - HeadCount by Department

1. What is this Chart trying to show?
It shows the number of employee headcount in each department.
2. What's wrong with the color choice?

The chart uses different shades of blue for every department, which can make the colors look like they represent different categories or values. The color difference is unnecessary.

3. Propose a better color scheme.
Use one consistent color for all bars such as medium blue. If highlighting one department is necessary use a contrasting color only for the department.

Chart 2 - Attendance by Class.

1. What is this chart trying to show?
It shows the attendance levels of students in different classes.

2. What's wrong with the color choice?
most bars use similar pink colors, but the last bar is bright blue without a clear reason. the colors may confuse the viewer because they do not represent a meaningful category.

3. Propose a better color scheme.
use one consistent color for all classes
Alternatively use different colors only if they represent meaningful categories such as high medium and low attendance
